### Selective Nitrations of 2-(1'-Phenylpyrazol-4'-yl) Benzimidazoles

#### Sabiha Rashid<sup>a</sup> and Misbahul Ain Khan<sup>b\*</sup>

<sup>a</sup>Department of Chemistry, Division of Science and Technology, University of Education, Lahore, Pakistan <sup>b</sup>Department of Chemistry, Islamia University, Bahawalpur, Pakistan

(received January 10, 2009; revised August 7, 2009; accepted August 8, 2009)

**Abstract.** Nitration of 2-(1'-phenylpyrazol-4'-yl) benzimidazole ring system was found to be temperature dependent. Room temperature nitration occurred at the phenyl ring of pyrazole, while at 100  $^{\circ}$ C, a dinitrated product is obtained where the second nitro group is introduced at the 5-position of the benzimidazole ring. Nitration at 100  $^{\circ}$ C leads directly to the expected dinitration product. Mass spectral fragmentations for both the compounds is described.

Keywords: pyrazoles, benzimidazoles, nitration, mass spectra

Pak. J. Sci. Ind. Res. 2009 52 (6) 293-295

## Effect of Methylmethacrylate and Ethylenediamine on the Physicomechanical Properties of High Strength Portland Cement

Noor-ul-Amin

Department of Chemistry, Abdul Wali Khan University, Mardan, Pakistan

(received November 11, 2008; revised September 18, 2009; accepted September 30, 2009)

**Abstract.** In the study of the effect of methylmethacrylate  $(C_5H_9O_2)$  and ethylenediamine  $(C_2N_2H_8)$  on the physicomechanical properties of high strength Portland cement, addition of methylmethacrylate upto 5% strength showed negative effect on the bulk density, cold crushing strength and hydration of the cement; however, the negative effect was relatively less in case of lower concentrations ( $\leq 2\%$ ). Addition of ethylenediamine upto 3% concentration showed remarkable increase in these properties.

Keywords: portland cement, additives, methylmethacrylate, ethylenediamine

Pak. J. Sci. Ind. Res. 2009 52(6) 296-302

## Kinetics and the Effect of Refining Methods on the Physicochemical Properties, Fat Soluble Vitamins and Nutritional Metal Content of *Hura crepitans* Oil

#### Adewale Adewuyi\* and Rotimi Ayodele Oderinde

Industrial Chemistry Unit, Department of Chemistry, University of Ibadan, Ibadan, Oyo State, Nigeria

(received March 16, 2009; revised May 21, 2009; accepted August 5, 2009)

**Abstract.** The effect of three refining methods, *viz.* alkali refining, degumming and bleaching was investigated on the physicochemical properties, fat soluble vitamins and nutritional metal content of *Hura crepitans* oil. The processes increased the glyceride content while there was reduction in the nutritional metal content of the oil. The effect of temperature (60-180 °C) and time (upto 90 min) was also considered using the bleaching method with surface active clay and activated charcoal. The adsorption of peroxides was adequately modeled by Arrhenius type of equation and described by the first-order kinetic. The activation energy for bleaching at 120 °C and 45 min was 244.60 cal/mole. Among all the refining methods, bleaching appeared to be the best technique for refining in terms of stability and improvement of physicochemical properties of the *H. crepitans* seed oil.

Keywords: oil refining methods, physicochemical properties, vegetable oil, Hura crepitans seed oil, vitamins, minerals

Pak. J. Sci. Ind. Res. 2009 52(6) 303-306

### Stability Studies on Refined Soybean Oil Stored in Various Conditions

J.O. Arawande<sup>a\*</sup> and I.A. Amoo<sup>b</sup>

<sup>a</sup>Department of Science Laboratory Technology, Rufus Giwa Polytechnic, P.M.B. 1019, Owo, Ondo State, Nigeria

<sup>b</sup>Department of Chemistry, Federal University of Technology, P.M.B. 704, Akure, Ondo State, Nigeria

(received October 9, 2008; revised October 24, 2009; accepted November 11, 2009)

Abstract: The 12 months stability study of freshly produced refined soybean oil revealed that refined soybean oil stored in plastic containers in dark was more hydrolytically and oxidatively stable than that stored in other containers in light condition. There was no significant difference at P < 0.05 in free fatty acids and acid value of oil stored under light and dark conditions in tin and glass containers but there was significant difference at P < 0.05 in peroxide value of oil stored in light and dark conditions in all the storage containers. Light increased the degree of oxidative rancidity of refined soybean oil, the most in tin containers, followed by glass containers and the least in plastic containers.

Keywords: soybean oil, light and dark conditions, stability study

Pak. J. Sci. Ind. Res. 2009 52 (6) 307-311

### Determination of Copper, Manganese, Nickel and Zinc in Different Cigarette Brands Available in Pakistan

#### Ishratullah Siddiqui, Durdana Rais Hashmi\*, Farooq Ahmad Khan, Akhtar Shareef, Ghulam Hussain Shaikh and Alia Bano Munshi

Centre for Environmental Studies, PCSIR Laboratories Complex, Shahrah-e-Dr. Salimuzzaman Siddiqui, Karachi-75280, Pakistan

(received May 15, 2009; revised September 3, 2009; accepted September 7, 2009)

Abstract. Mean values of copper, manganese, nickel and zinc in different cigarette brands sold in Pakistan were found to be in the range of 8.61 to 94.67  $\mu$ g/g, 26.40 to 98.20  $\mu$ g/g, 0.61 to 8.58  $\mu$ g/g and 16.92 to 99.60  $\mu$ g/g, respectively, through Atomic Absorption Spectrophotometer (AAS). The results are discussed with reference to and in comparison with the mean average concentration of these elements reported in the cigarettes of other countries.

Keywords: cigarette, tobacco, smoking, heavy metals, health effect

Pak. J. Sci. Ind. Res. 2009 52(6) 312-315

### Studies on Cu (II) and Ni (II) Sulphate Chelates of Benzyl, Salicylic and Acetyl Salicylo-Hydrazones

#### H.D. Aliyu

Chemistry Department, University of Abuja, Abuja, Nigeria

(received October 8, 2008; revised August 6, 2009; accepted September 30, 2009)

**Abstract:** Six complexes of Cu(II) and Ni(II) sulphate of acetaldehyde, benzaldehyde and salicylic acid with salicylic hydrazide were synthesized and characterized. The hydrazone acts as neutral bidentate clones coordinating *via* the carbonyl oxygen and its azomethine nitrogen, while the sulphate ions are in the outer coordination sphere. The bioactivities of ligands were enhanced on complexation.

Keywords: sulphate chelates, salicylic hydrazides, acetyl salicylo-hydrazones, hydrazones

Pak. J. Sci. Ind. Res. 2009 52 (6) 316-318

### Effect of Additives on the Yield and Quality of Palm Oil

M. O. Odo\*, F. M. Ugwu and C. A. Mbachu

Department of Food Science and Technology, Ebonyi State University, Abakaliki, Nigeria

(received August 20, 2008; revised October 10, 2009; accepted October 13, 2009)

**Abstract.** In the study of the effect of additives namely *Manihot esculenta* Crantz, (cassava), *Erythrina senegalensis* (ukwa) and *Oxytenanthera* species (bamboo) leaves, on the yield and quality of traditionally processed palm oil, the raw leaves were found to contain some anti-nutrients like tannins, oxalates, trypsin inhibitors, alkaloids and phytic acid at tolerable levels. The additives increased the yield from 300 ml (of the control) to 450 ml with a standard deviation of 60.6 ml. The peroxide value was in the range of 0.4-1.0 meq/kg, free fatty acid varied between 0.847-1.12 mg KOH/g, iodine value between 51.01-52.54, saponification value between 7.84-93.97 KOH/g of oil and moisture content, between 1.4-1.8%. Analysis of variance (ANOVA) showed significant differences, (P<0.05) in the yield, relative density, peroxide value, iodine value and saponification values. However, there were no significant differences (P>0.05) in the moisture contents, free fatty acid, specific gravity, smoke point, flash point and fire points. The standard deviation results revealed that the palm oil produced using ukwa leaf differed from the others in terms of smoke, flash, and fire points. Cassava leaves was the best of the studied additives in terms of yield with the physical properties comparing favourably with the control. Chemical properties were similar to the control with the exception of the saponification value.

Keywords: palm oil, additives, yield, Manihot esculenta, Erythrina senezalensis, Oxytenathera sp.

## **Biological Sciences**

### **Cotton Leaf Curl Rajasthan Virus Infecting Tomato in Pakistan**

Muhammad Shafiq Shahid\*, Liaqat Ali and Saiqa Wajid

National Institute for Biotechnology and Genetic Engineering, P.O. Box 577, Jhang Road, Faisalabad, Pakistan

(received June 11, 2009; revised September 10, 2009; accepted October 21, 2009)

**Abstract:** Tomato plants showing phenotypically symptoms of tomato leaf curl disease (ToLCD) were collected in Faisalabad, Pakistan. These exhibited a severe downward leaf curling with enation on the lower side of the leaf. In order to identify the begomovirus components associated with the disease phenotypes, DNA extracted from them was screened by PCR using specific primers for ToLCNDV DNA A and DNA B and a universal beta satellite primer pair (designed to detect all beta satellite). Tomato sample was found positive for ToLCNDV DNA A and beta satellite. The fragments amplified were cloned and sequenced. The begomovirus sequence obtained showed the highest levels of sequence identity (99%) to cotton leaf curl Rajasthan virus (CLCuRV), a virus previously identified in cotton showing symptoms of cotton leaf curl disease (CLCuD). The sequence of beta satellite showed 99% identity to the beta satellite associated with CLCuD. This is the first time CLCuRV has been identified in tomato and indicates that this host can serve as a reservoir for the agent causing CLCuD. Partial repeat constructs for *Agrobacterium*-mediated inoculation have been produced to show infectivity of these clones (to fulfill Koch's postulates), for studying their host range and potential threat to crops.

Keywords: begomovirus, geminivirus, whitefly, tomato disease, beta satellite, CLCuRV in tomato, CLCuD

Pak. J. Sci. Ind. Res. 2009 52 (6) 322-327

### Effects of Delayed Mating on Reproductive Performance of *Ephestia cautella* [Walker] [Lepidoptera: Pyralidae]

#### J. O. Akinneye\* and M. O. Ashamo

Storage Research Laboratory, Department of Biology, Federal University of Technology, Akure, Nigeria

(received January 26, 2009; revised September 30, 2009; accepted October 10, 2009)

**Abstract.** The effect of age at mating of male and female warehouse moth, *Ephestia cautella* (Walker), soon after the emergence or delayed for 1-5 days was studied on the number of eggs laid (fecundity), egg viability, longevity and adult emergence. It was found that with the delay in mating after emergence of male, female or both, the number of eggs laid decreased proportionately. Egg viability decreased when female or both male and female were delayed from mating for more than 4 days. Male insects, that were delayed from mating, lived longer than the females delayed from mating. Average male and female longevity in all the treatments was 10 and 7 days, respectively. Delayed mating had significant effect on females than on males. Unmated males lived longer than the mated males. Thus methods that can delay and disrupt mating may be effective behavioural strategies for managing *E. cautella*.

Keywords: Ephestia cautella, mating delay, longevity, adult emergence, eggs

Pak. J. Sci. Ind. Res. 2009 52 (6) 328-333

## Evaluation of Five Indigenous Medicinal Plants of Sindh, Pakistan for their Antifungal Potential

Erum Naz<sup>a\*</sup> and Mansoor Ahmad<sup>b</sup>

<sup>a</sup>Department of Microbiology, University of Karachi, Karachi-75270, Pakistan <sup>b</sup>Research Institute of Pharmaceutical Sciences, Department of Pharmacognosy, University of Karachi, Karachi-75270, Pakistan

(received May 18, 2009; revised October 7, 2009; accepted October 12, 2009)

**Abstract.** Candidiasis and systemic mycosis due to opportunistic pathogens is frequently reported in Sindh, especially in rural areas. In search of local antifungal medicinal plants, methanol, petroleum ether and aqueous extracts of five native medicinal plants *Trachyspermum ammi*, *Hyoscyamus niger*, *Carum roxburgianum*, *Linum usitatissimum* and *Centella asiatica* were screened against five *Candida* strains including three strains of *Candida albicans* and one strain of *C. glabrata* and *C. tropicalis*, each. Antimicrobial screening of five filamentous fungal strains of clinical origin comprising of three strains of *Aspergillus niger*, one species of *A. flavus* and *Penicillium* each, revealed 100% activity of methanolic extract of *T. ammi*; petroleum ether extract of *T. ammi* and *H. niger* and methanolic extracts of *H. niger*, *C. asiatica* and *C. roxburgianum* produced 60, 20, 50, 50 and 10% inhibition, respectively, whereas, *L. usitatissimum* was inactive. Reference antibiotics were Nystatin and Amphotericin-B for yeast species and filamentous fungi, respectively. Least minimum inhibitory concentration (125 µg/disc) against *Candida* sp. was produced by the methanolic extract of *T. ammi* and *H. niger* and 500 and 1000 µg/disc against *Aspergillus* species, respectively. Results indicated that *T. ammi* and *H. niger* may be considered as potential future antifungal agents.

Keywords: mycosis, candidiasis, Trachyspermum ammi, Hyoscyamus niger, Carum roxburgianum, Linum usitatissimum, Centella asiatica, filamentous fungi

Pak. J. Sci. Ind. Res. 52 (6) 334-337

### Potassium Dynamics Under Exhaustive Cropping of Sudan Grass (Sorghum vulgare) in Some Indian Soils

#### G. Ali Roshani<sup>a\*</sup> and G. Narayanasamy<sup>b</sup>

<sup>a</sup>Department of Soil and Water, Golestan Agricultural Research Center, Gorgan, Iran <sup>b</sup>Division of Soil Science and Agricultural Chemistry, IARI, New Delhi- 12, India

(received May 28, 2008; revised August 29, 2009; accepted October 10, 2009)

**Abstract.** In order to study the effect of different levels of K exhaustion on potassium dynamics, Sudan grass was grown in clay pots containing 5 kg of three types of soils each namely Alfisol, Vertisol, and Inceptisol from India. Potassium was applied at the rate of 0, 50, 100, and 200 mg/kg before starting the experiment and after each of the first three cuttings. Seven cuts of Sudan grass were taken over a period of 280 days, at 4-6 week intervals. Potassium content of Sudan grass increased with increased amounts of K applied as fertilizer. The highest values for K concentration in Sudan grass were recorded in the 1<sup>st</sup> and the 2<sup>nd</sup> cuts and gradually decreased up to the last cut, but the rate of decrease was much lower in moderately exhausted soils (AK<sub>200</sub>, BK<sub>200</sub>, and RK<sub>200</sub>). In Inceptisol and Vertisol as the intensity of exhaustion increased the contribution of non-exchangeable K (NE-K) to meet the plant demand also increased, but in Alfisol a reverse trend was noticed (decrease in replenishment rate). Total amount of NE-K utilized by crop was high in K<sub>0</sub> and low in K<sub>200</sub> treatment in all the soils, but the proportion of percent share of K<sub>0</sub>/K<sub>200</sub> was the highest in Inceptisol (4.5), medium in Vertisol (3.50) and the lowest in Alfisol (2.29).

Keywords: K dynamics, K depletion, exhaustive cropping, Sudan grass, Indian soils, Sorghum vulgare

Pak. J. Sci. Ind. Res. 2009 52 (6) 338-340

### Advanced Wheat Genotypes Response to *Helicoverpa armigera* Hubner Infestation

#### Lal Hussain Akhtar<sup>a</sup>\*, Altaf Hussain Tariq<sup>a</sup>, Manzoor Hussain<sup>a</sup>, Rana Muhammad Iqbal<sup>b</sup> and Marghub Amer<sup>c</sup>

<sup>a</sup>Regional Agricultural Research Institute (RARI), Bahawalpur, Pakistan <sup>b</sup>Cholistan Institute of Desert Studies, The Islamia University of Bahawalpur, Pakistan <sup>c</sup>Sub-Campus University of Agriculture Faisalabad at Depalpur, Okara, Pakistan

(received December 18, 2008; revised September 30, 2009; accepted November 12, 2009)

**Abstract.** In the evaluation of the response of 20 wheat genotypes in terms of spike and grain damage caused by *Helicoverpa armigera* Hubner, a significant genotypic variability was found to exist among the wheat genotypes for all the traits studied. Grain yield ranged from 2931 (DN-10) to 4333 (AUP-9701) kg/ha, whereas, spike and grain damage ranged from 19.95 to 80.47 and 3.90 to 22.16% in various wheat genotypes, respectively.

Keywords: Triticum aestivum, Helicoverpa armigera, variety, grain yield, losses

## The Effect of Unsaturated Polyester Resin from Recycled PET as Compatibilizer for Styrene-Butadiene (SBR)/Acrylonitrile-Butadiene (NBR) Rubber Blend

#### Tehzeeb Akhter\*, Nudrat Zahid Raza, Khalid Mahmood and Mahmood Iqbal

Material Science Research Centre, PCSIR Laboratories Complex, Sharah-e-Dr. Salimuzzaman Siddiqui, Karachi-75280, Pakistan

(received March 3, 2009; revised September 16, 2009; accepted September 30, 2009)

**Abstract.** Unsaturated polyester resin (UPR) from recycled PET flakes was prepared by depolymerization with propylene glycol and polyesterified with adipic acid. The effect of addition of 5, 10 and 15 phr of unsaturated polyester resin (UPR) on the compatibility and physicomechanical properties of styrene-butadiene rubber (SBR) and acrylonitrile-butadiene rubber (NBR) blends were studied. DSC, TGA, MDR, FTIR and chemical methods were used to determine the degree of compatibility. The mechanical and physical properties of the blends were found to improve with addition of 10 phr UPR for SBR/NBR blend.

**Keywords:** polyester resin, PET flakes recycled, Styrene-butadiene rubber, acrylonitrile-butadiene rubber, depolymerization, unsaturated polyester resin, rubber blends

longispinus (Targioni and Tozzetti) (Homoptera: Pseudococcidae)	
Waseem A. Gillani, M. J. W. Copland and Shazia Raja	270
Short Communication	
Optimization of Substrate Concentration for Enhanced Citric Acid Production by Aspergillus niger M-101	
Aftab Nadeem, Saghir Ahmad Jafri, Shahjahan Baig, Muhammad Irfan and Quratulain Syed	275
Technology	
Process Optimization of Experimental Variables Using Plackett-Burman Design for	
Decolourisation of Reactive Blue 222 by a Novel Bacterial Consortium Isolated from the Gut of Termites	
K. Nanthakumar, K. Karthikeyan, C. K. Venil and P. Lakshmanaperumalsamy	278

## Vol. 52, No. 6, November - December 2009

Selective Nitrations of 2-(1'-Phenylpyrazol-4'-yl) Benzimidazoles	
Sabiha Rashid and Misbahul Ain Khan	289
Effect of Methylmethacrylate and Ethylenediamine on the Physicomechanical Properties of High Strength Portland Cement	
Noor-ul-Amin	293
Kinetics and the Effect of Refining Methods on the Physicochemical Properties,	
Fat Soluble Vitamins and Nutritional Metal Content of Hura crepitans Oil	
Adewale Adewuyi and Rotimi Ayodele Oderinde	296
Stability Studies on Refined Soybean Oil Stored in Various Conditions	
J. O. Arawande and I. A. Amoo	303
Determination of Copper, Manganese, Nickel and Zinc in Different Cigarette Brands	
Available in Pakistan	
Ishratullah Siddiqui, Durdana Rais Hashmi, Farooq Ahmad Khan, Akhtar Shareef,	
Ghulam Hussain Shaikh and Alia Bano Munshi	307
Studies on Cu (II) and Ni (II) Sulphate Chelates of Benzyl, Salicylic and Acetyl	
Salicylo Hydrazones	
H. D. Aliyu	312
Effect of Additives on the Yield and Quality of Palm Oil	
M.O. Odo, F.M. Ugwu and C.A. Mbachu	316
Biological Sciences	
Cotton Leaf Curl Rajasthan Virus Infecting Tomato in Pakistan	
Muhammad Shafiq Shahid, Liaqat Ali and Saiqa Wajid	319
Effects of Delayed Mating on Reproductive Performance of <i>Ephestia cautella</i> [Walker] [Lepidoptera: Pyralidae]	
J. O. Akinneye and M. O. Ashamo	322
Evaluation of Five Indigenous Medicinal Plants of Sindh, Pakistan for their Antifungal Potential	
Erum Naz and Mansoor Ahmad	328
Potassium Dynamics Under Fyhaustive Cronning of Sudan Grass (Sorahum vulgare)	
in Some Indian Soils	
G. Ali Roshani and G. Narayanasamy	334
	001

## Pakistan Journal of Scientific and Industrial Research Volume 52 Subject Index

Acetyl-salicylo hydrazones, Cu and Ni sulphate chelates of	<b>52</b> (6)312
Additives effect on Portland cement properties	<b>52</b> (6)293
Additives effect on palm oil yield and quality	<b>52</b> (6)316
Al and Ni separation by phosphoric acid-kerosene system	
Amino acid composition of cooked walnut flour	<b>52</b> (3)130
Amino acid quality of germinating pearl millet	<b>52</b> (3)122
Ammi majus, seed oil of	<b>52</b> (5)260
Amperometric technique in measurements, weak current	
Amylolytic Bacillus species growth measurement	
Antibacterial activity of common food varieties	<b>52</b> (3)143
Antibacterial agents, azaindole derivatives as	<b>52</b> (1)1
Anticonvulsants, new substituted quinazolinones as	<b>52</b> (1)8
Antimicrobial evaluation of some pyrimidine derivatives	<b>52</b> (4)180
Antimicrobial screening of methyl glucopyranoside derivatives	<b>52</b> (3)138
Arabian Sea, lobsters from northern	<b>52</b> (2)107
Aromatic hydrocarbons spatial assessment in streambed sediments, polycyclic	<b>52</b> (5)253
Aspergillus niger, enhanced citric acid production by	<b>52</b> (5)275
Azaindole derivatives as antibacterial agents	<b>52</b> (1)1
Azo dyes, synthesis and spectral study of novel coumarin based disperse	<b>52</b> (3)117
Bacillus species, growth measurement of amylolytic	<b>52</b> (1)22
Bacterial consortium from termite gut for Reactive Blue 222 decolourization	<b>52</b> (5)278
Bacteriocin like productions by <i>Bacillus lentus</i>	<b>52</b> (4)191
Bean beetle control by citrus seed oil	<b>52</b> (1)18
Benzimidazoles, nitrations of phenylpyrazol	<b>52</b> (6)289
Benzyle hydrazones, Cu and Ni sulphate chelates of	<b>52</b> (6)312
Biodiesel from soybean oil effect on diesel engine exhaust	<b>52</b> (4)217
Biodiesel production, potential of soybean oil for	<b>52</b> (5)264
Bioelectromagnetic measurements, weak current amperometric technique in	<b>52</b> (2)91
Biopreservatives for foods, new	<b>52</b> (4)191
Bunium cylindricum, seed oil of	<b>52</b> (5)260
Bunium persicum, seed oil of	
Callosobruchus maculatus control by citrus seed oil	<b>52</b> (1)18
Candidiasis, antifungal potential of plants against	<b>52</b> (6)328
Chaetomium thermophilum xylanase gene, heterologous expression of	
Chickpea yield, zinc role in stimulating	<b>52</b> (2)80
Cichorium intybus effect on Cisplatin-induced nephrotoxicity	<b>52</b> (4)208
Cigarettes, metal determination in Pakistani	<b>52</b> (6)307
Cisplatin-induced nephrotoxicity, <i>Cichorium intybus</i> effect on	<b>52</b> (4)208
Citric acid production by Aspergillus niger, enhanced	<b>52</b> (5)275
Citrus seed oil for bean beetle control	<b>52</b> (1)18
Clay mineralogy in relation to potassium fertilization of sugar cane crops	
CLCuRV infection in tomato	<b>52</b> (6)319

Copxykil against microbes	<b>52</b> (3)151
Cotton leaf curl virus in tomato	<b>52</b> (6)319
Coumarin based disperse azo dyes, synthesis and spectral study of novel	<b>52</b> (3)117
Cyanex in kerosene, Ti and Fe separation from sulphate solution by	<b>52</b> (5)231
D2EHPA-kerosene system for Al and Ni separation	<b>52</b> (2)59
Diesel blends in DI-CI engines, VOCs emitted by	<b>52</b> (3)158
Diesel engine exhaust, effect of biodiesel from soybean oil on	<b>52</b> (4)217
Drought, salicylic acid induced changes in wheat under	<b>52</b> (2)75
Ducrosia anethifolia seed oil	<b>52</b> (5)260
E. coli, antibacterial activity of common foods against	<b>52</b> (3)143
Engines, VOCs emitted by diesel blends in DI-CI	<b>52</b> (3)158
Ephestia cautella, delayed mating effect on	<b>52</b> (6)322
Ethylenediamine effect on Portland cement	<b>52</b> (6)293
Fe and Ti separation from sulphate solution by Cyanex	<b>52</b> (5)231
Fertilizer effect on soybean oil content for biodiesel production	<b>52</b> (5)264
Fish dryer, solar	<b>52</b> (4)228
Floxacine brands analysis and data comparison	<b>52</b> (4)186
Fluoride medium, Al and Ni separation from	<b>52</b> (2)59
Food biopreservatives, new	<b>52</b> (4)191
Foods, antibacterial activity of common	<b>52</b> (3)143
Heavy metals in vegetables	<b>52</b> (3)134
Helicoverpa armigera infestation, wheat genotypes response to	<b>52</b> (6)338
Humidity effect on Pseudococcus longispinus	<b>52</b> (5)270
Hura crepitans oil refining	<b>52</b> (6)296
Hydazones, Cu and Ni sulphate chelates of	<b>52</b> (6)312
Hydroxamic acids, synthesis and characterization of valero and isovalero	<b>52</b> (5)239
Juglans regia flour, amino acid quality of cooked	<b>52</b> (3)130
Kanwa starch modification	<b>52</b> (1)44
Kaolin, blue pigment from	<b>52</b> (1)15
Kerosene, Zn extraction from aqueous sulphate media by phosphoric acid in	<b>52</b> (4)173
Kerosene-phosphoric acid system for Al and Ni separation	<b>52</b> (2)59
Lipolytic enzyme activity of Sesamum indicum seeds	<b>52</b> (2)66
Lobsters from northern Abrabian Sea	<b>52</b> (2)107
Mealy bug, humidity effect on long tailed	<b>52</b> (5)270
Measurements, weak current amperometric technique for	<b>52</b> (2)91
Medicinal plants of Pakistan, antifungal potential of	<b>52</b> (6)328
Metal determination in Pakistani cigarettes	<b>52</b> (6)307
Methotrexate quantification for plasma level monitoring	<b>52</b> (3)154
Methyl glucopyranoside derivatives antimicrobial screening	<b>52</b> (3)138
Methylethacrylate effect on Portland cement	<b>52</b> (6)293
Micronutrient role in stimulating chickpea yield	<b>52</b> (2)80
Microwave irradiation for 4-thiazolidinone derivative synthesis	<b>52</b> (2)70
Nephrotoxicity, Cichorium intybus effect on Cisplatin-induced	<b>52</b> (4)208

Nitrations of phenylpyrazol benzimidazoles	<b>52</b> (6)289
Ni and Cu fertilization effect on rice production, nitrogen tracer study of	<b>52</b> (1)53
Nitrogen tracer study of nitrogen fertilization effect on rice production	<b>52</b> (1)53
Noise production by oil refinery pumps and control	<b>52</b> (3)167
Oil, additives effect on yield and quality of palm	<b>52</b> (6)316
Oil of four members of Umbelliferae, seed	<b>52</b> (5)260
Oil refinery pumps, noise production by	<b>52</b> (3)167
Oil, stability study of stored refined soybean	<b>52</b> (6)303
Palm oil yield and quality, additives effect on	<b>52</b> (6)316
Pearl millet, amino acid quality of germinating	
Pennisetum typhoides grains, amino acid quality of germinating	
Phosphoric acid in kerosene, Zn extraction from aqueous sulphate media by	<b>52</b> (4)173
Phosphoric acid-kerosene system for Al and Ni separation	<b>52</b> (2)59
Pigment from Kaolin, blue	<b>52</b> (1)15
Plant available sulphur relationship to soil characteristics	<b>52</b> (2)84
Plasma level monitoring by methotrexate quantification	<b>52</b> (3)154
Ploidy level study in wheat genotypes	
Polyester resin effect on SBR/NBR rubber blends	<b>52</b> (6)341
Portland cement, additive effect on	<b>52</b> (6)293
Potassium dynamics of Sorghum vulgare	<b>52</b> (6)334
Potassium fertilization of sugar cane, effect on clay mineralogy	<b>52</b> (1)32
Pothwar soil characteristics, relationship of sulphur in plants to	<b>52</b> (2)84
Process optimization for Reactive Blue 222 decolourization	<b>52</b> (5)278
Prosopis juliflora growth, industrial soil pollution effect on	<b>52</b> (1)37
Pseudococcus longispinus, humidity effect on	
Pyrimidine derivatives synthesis and antimicrobial evaluation	<b>52</b> (4)180
Quinazolinones, new substituted; as anticonvulsants	<b>52</b> (1)8
Reactive Blue 222 decolourization by bacterial consortium from termite gut	
Refining methods of Hura crepitans oil	<b>52</b> (6)296
Rubber blends SBR/NBR, unsaturated polyester resin effect on	<b>52</b> (6)341
S. aureus, antibacterial activity of common foods against	
S. typhi, antibacterial activity of common foods against	<b>52</b> (3)143
Salicylic acid induced changes in wheat under drought	<b>52</b> (2)75
Salicylic hydrazones, Cu and Ni sulphate chelates of	<b>52</b> (6)312
Schistosomiasis endemicity in Ekiti State of Nigeria, urinary	<b>52</b> (1)28
Seed oil of four members of Umbelliferae	<b>52</b> (5)260
Sesamum indicum, optimum conditions for activity of lipolytic enzymes of	<b>52</b> (2)66
Silver coated carbon for water disinfection	<b>52</b> (1)47
Soil pollution effect on Prosopis juliflora growth, industrial	<b>52</b> (1)37
Soils, relationship of sulphur in plants to characteristics of Pothwar	<b>52</b> (2)84
Solar fish dryer	<b>52</b> (4)228
Sorghum vulgare, potassium dynamics of	<b>52</b> (6)334
Soybean oil biodiesel effect on diesel engine exhaust	<b>52</b> (4)217

#### Pak. J. Sci. Ind. Res. 2009, Vol.52, Subject Index

Soybean oil content, effect of biofertilizers and chemical fertilizers on	<b>52</b> (5)264
Soybean oil, stability study of stored refined	
Sponge cake quality, effect of water chestnut starch on	<b>52</b> (3)146
Starch modification of Kanwa	
Streambed sediments, spatial assessment of aromatic hydrocarbons in	
Sudan grass, potassium dynamics of	
Sugar cane potassium fertilization effect on clay mineralogy	
Sulphate media, Ti and Fe separation by Cyanex-272 from aqueous	
Sulphate media, Zn extraction by phosphoric acid-kerosene system from aqueous	
Sulphur-in-plants relationship to Pothwar soil characteristics	<b>52</b> (2)84
Technique in measurement, amperometric	
Termite gut, Reactive Blue 222 decolourization by bacterial consortium from	
Thiazolidinone derivative synthesis using tributylammonium bromide	<b>52</b> (2)70
Ti and Fe separation from sulphate solution by cyanex in Kerosene	
Tomato, CLCuRV infection in	<b>52</b> (6)319
Trapa bispinosa starch effect on sponge cake quality	<b>52</b> (3)146
Triazoles, synthesis and anti-inflammatory activity of substituted	
Tributylammonium bromide for 4-thiazolidinone derivative synthesis	
Triticum aestivum genotypes, ploidy level study in	
Umbelliferae members, seed oil of	
Unsaturated polyester resin effect on SBR/NBR rubber blends	<b>52</b> (6)341
Urinary schistosomiasis endemicity in Ekiti State of Nigeria	
UV detection for plasma level monitoring	<b>52</b> (3)154
Valero and isovalero hydroxamic acid synthesis and characterization	
Vegetable oil from Hura crepitans	<b>52</b> (6)296
Vegetables, heavy metals in	
Volatile organic compounds emitted by DI-CI engines	
Walnut, amino acid quality of cooked	<b>52</b> (3)130
Warehouse moth, delayed mating effect on	
Water chestnut starch effect on sponge cake quality	<b>52</b> (3)146
Water disinfection by silver coated carbon	
Wheat genotypes response to Helicoverpa armigera infestation	
Wheat genotypes, ploidy level study in	
Wheat, salicylic acid induced changes under drought in	
Xylanase gene of Chaetomium thermophilum, heterologous expression of	
Zinc extraction from aqueous sulphate media by phosphoric acid-kerosene system	
Zinc role in stimulating chickpea yield
