Pakistan Journal of Scientific and Industrial Research started in 1958, has been bifurcated in 2011 into:

**Series A: Physical Sciences** [ISSN 2221-6413 (Print); ISSN 2223-2559 (online)] (appearing as issues of January-February, May-June and September-October) and

**Series B: Biological Sciences** [ISSN 2221-6421 (Print); ISSN 2223-2567 (online)] (appearing as issues of March-April, July-August and November-December).

Each Series will appear three times in a year.

**This Journal is indexed/abstracted** in Biological Abstracts and Biological Abstracts Reports, Chemical Abstracts, Geo Abstracts, CAB International, BioSciences Information Service, Zoological Record, BIOSIS, NISC, NSDP, Current Contents, CCAB, Rapra Polymer Database, Reviews and Meetings and their CD-ROM counterparts etc.

**Subscription rates (including handling and Air Mail postage):** *Local:* Rs. 2500 per volume, single issue Rs. 425; *Foreign:* US\$ 450 per volume, single issue US\$ 75.

**Electronic format** of this journal is available with: ProQuest Information and Learning, 789 E. Eisenhower Parkway, P.O. Box 1346, Ann Arbor, MI 48106-1346, U.S.A.; Fax.No.+1.734.997.4268; <http://www.proquest.com>.

**Photocopies of back issues** can be obtained through submission of complete reference to the Executive Editor against the payment of Rs. 25 per page per copy (by Registered Mail) and Rs. 115 per copy (by Courier Service), within Pakistan; US\$ 10 per page per copy (by Registered Mail) and US\$25 per page per copy (by Courier Service), for all other countries.

**Copyrights** of this Journal are reserved; however, limited permission is granted to researchers for making references, and libraries/agencies for abstracting and indexing purposes according to the international practice.

## **AIMS & SCOPE**

Pakistan Journal of Scientific and Industrial Research ( PJSIR ) was started in 1958 to disseminate research results based on utilization of locally available raw materials leading to production of goods to cater to the national requirements and to promote S&T in the country. Over the past 60 years, the journal conveys high quality original research results in both basic and applied research in Pakistan. A great number of major achievements in Pakistan were first disseminated to the outside world through PJSIR.

It is a peer reviewed journal and published in both print and electronic form. Original research articles, review articles and short communications from varied key scientific disciplines are accepted however, papers of Pure Mathematics, Computer Sciences, Engineering and Medical Sciences are not entertained.

From 54<sup>th</sup> Volume in 2011, it has been bifurcated into Series A: Physical Sciences & Series B: Biological Sciences. Each series appears three times in a year as follows:

Physical Sciences in January-February, May-June and September-October issues. It includes research related to Natural Sciences, Organic Chemistry, Inorganic Chemistry, Industrial Chemistry, Physical Chemistry, Environmental Sciences, Geology, Physics, Polymer Sciences and Technology.

Biological Sciences in March-April, July-August and November-December issues. Papers included in this series are from Agriculture, Agronomy, Botany, Biochemistry, Biotechnology, Food Sciences, Genetic Engineering, Pharmaceutical Sciences, Microbiology, Marine Sciences, Soil Sciences, Tissue Culture, Zoology and Technology.

Due to many global issues, we are encouraging contributions from scientists and researchers from all across the globe with the sole purpose of serving scientific community worldwide on the whole and particularly for our region and third world countries.

**Abstract.** Field research was conducted during summer season in 2010, in order to determine the effective combination between potato varieties i.e., the best yielding potato cultivar under organic or inorganic fertilizer in Skardu valley, Gilgit-Baltistan, Pakistan. A randomized complete block design (RCBD) was used for the trial and both the experimental factors (cultivar and fertilizer type) significantly affected the crops growth and yield variables. Among the nine different organic and inorganic fertilizer treatments, the maximum mean values of sprouting rate 43.1%, plant height 49.5 cm, number of tubers/plant (8.5), weight of tubers/plant (385.9 g), tuber diameter 3.8 cm and yield (25.7 t/ha) were obtained in the crops which received 10 tonnes FYM/ha + 150 kg N/ha. Among the cultivars tested, Desiree showed the maximum mean values of sprouting rate 30.4%, plant height 36.7 cm, number of tubers/plant 7.3, weight of tubers/plant 350.3 g, tuber diameter 3.7 cm and yield 23.4 t/ha. Overall results revealed that the treatment matched to 10 t/ha FYM + 150 kg/ha N (T7) led to the highest tuber yield and Desiree showed better performances than other cultivars.

**Keywords:** potato cultivars, fertilizer levels, yield, Skardu

## Mutagenic Effects on the Growth, Reproductive and Yield Parameters of *Praecitrullus fistulosus*

**Mehreen Khan, Muhammad Rafiq\*, Syed Habib Ahmed Naqvi,  
Naseem Khatoon and Muhammad Umar Dahot**

Institute of Biotechnology and Genetic Engineering, University of Sindh, Jamshoro, Pakistan

(received June 2, 2016; revised December 11, 2016; accepted December 13, 2016)

---

**Abstract.** The aim of this study was to modify the growth, reproductive and yield parameters of *Praecitrullus fistulosus* by mutagenesis. The seeds of the plant were treated with chemical mutagens including ethidium bromide and colchicine in concentration of (0.05 and 0.10%) and (0.01 and 0.02%), respectively. Seeds were also treated with UV rays at periods of 1 and 2 h and X-rays for 75 KeV at periods of 5 and 10 sec. The growth features were observed at an interval of one week till the 11<sup>th</sup> week of their growth period. The data showed that seed germination value and lethality (%) of plants were 80 and 75%, respectively and highest in control plants. The time of seed germination (1.6 days) was least in plants treated with X-rays (10 sec). The mutation frequency (80%) was found to be highest in X-rays (10 sec) and colchicine 0.02%. The vegetative growth parameters such as stem length (77 cm), length of leaves (6.6 cm), average number of leaves (36) and leaf surface area (49.6 cm<sup>2</sup>) was highest against ethidium bromide 0.01%, colchicine 0.02%, ethidium bromide 0.10% and UV rays 1 h, respectively. While the average diameter of stem of control plants was highest (49.6 cm<sup>2</sup>). The minimum flowering time (31 days) and fruiting time (42.5 days) were observed in ethidium bromide 0.05% and colchicine 0.01% treated plants. The highest number of fruits (4) was observed in colchicine 0.01% treated plants. In conclusion, seeds of *P. fistulosus* treated with ethidium bromide and colchicine caused positive impact on growth, reproduction and yield attributes as compared to UV and X-rays treatments.

**Keywords:** mutagenic effects, physical mutagens, chemical mutagens, *Praecitrullus fistulosus*

## Effect of Physical, Chemical and Physiochemical Treatments of Surface Sterilisation on Medicinal Plants *Salvadora persica* and *Solanum surattense* for *In-vitro* Propagation

Beena Naqvi<sup>a\*</sup>, Saleema Mehboob Ali<sup>b</sup>, Kiran Makhani<sup>b</sup> and Kamran Yousuf<sup>b</sup>

<sup>a</sup>PCSIR Laboratories Complex, Shahrah-e-Dr.Salimuzzaman Siddiqui, Karachi-75280, Pakistan

<sup>b</sup>Department of Biotechnology, University of Karachi, Karachi-75270, Pakistan

(received June 23, 2016; revised November 25, 2016; accepted December 15, 2016)

---

**Abstract.** Effect of various surface sterilisation treatments on medicinal plants *Salvadora persica* and *Solanum surattense* has been studied for *in-vitro* propagation. Surface sterilisation treatment was applied by physical, chemical and physiochemical means. Chemical sterilisation was done with sodium hypochlorite, physically with sonication and physiochemically with combination of both. Sodium hypochlorite alone was found to be effective for smooth textured plant i.e., *Salvadora persica*, whereas for rough textured plant *Solanum surattense* a combination of both physiochemical means yielded good results. However, sonication alone did not render the effective way of surface sterilisation. Moreover, for *Salvadora persica*, 10% sodium hypochlorite was effective in eliminating bacterial or fungal growth whereas in *Solanum surattense*, a concentration of 15% sodium hypochlorite proved to be effective. In general, best results were achieved in the combined treatment by physiochemical means.

**Keywords:** physiochemical treatment, surface sterilisation, *in-vitro* propagation

# Application of Spectroscopic Techniques for Antioxidant Property Analysis of Various Food Supplements and *Ganoderma lucidum* Coffee

**Zeynep Aygun**

Bitlis Eren University, Vocational School of Technical Sciences, Bitlis, Turkey

(received August 29, 2016; revised January 10, 2017; accepted February 10, 2017)

---

**Abstract.** In the present study, different methods were used to investigate the magnetic and structural properties of some food supplements and a kind of *Ganoderma lucidum* coffee. In order to understand the antioxidant capability of the samples and to detect paramagnetic centres, EPR (Electron Paramagnetic Resonance) experiment was carried out at room temperature. To examine the structural features and crystalline property of the samples, XRD (X-ray diffraction) method was used. SEM (Scanning Electron Microscopy) technique was preferred to analyse the surface morphology. Also, EDS (Energy Dispersive Spectroscopy) was performed to get information about the elemental composition of the samples. Antioxidant potential of these samples were examined in detail which is important to support our body functions.

**Keywords:** antioxidant property, coffee, food supplements, *Ganoderma lucidum*

---

## **Biochemical Evaluation of *Trigonella foenum graecum* (Fenugreek) With Special Reference to Phenolic Acids**

**Imran Pasha, Muhammad Asim Shabbir, Muhammad Adnan Haider, Bahzad Afzal,  
Muhammad Farhan Jahangir Chughtai\*, Shabbir Ahmad and Muhammad Sajid Manzoor**

National Institute of Food Science & Technology, Faculty of Food, Nutrition & Home Sciences,  
University of Agriculture, Faisalabad, Pakistan

(received August 15, 2016; revised November 9, 2016; accepted December 28, 2016)

---

**Abstract.** In current study nutritional constituents of fenugreek seeds *Trigonella foenum graecum* and antioxidant potential was determined. Rheological aspects of fenugreek supplemented flour were evaluated. Total phenolic contents (TPC) were quantified by using spectrophotometer. TPC content was higher in ethanol extract as compared to methanol extract, accounted for 9.11mg GAE/g, and 7.82mg GAE/g, respectively. High pressure liquid chromatography was used to analyze the individual phenolic acids. Chlorogenic acid was found in higher quantity accounted for 167.9 µg/g and sinapic acid with lowest amount 8.6 µg/g. Composite flours with treatments T<sub>1</sub>, T<sub>2</sub>, T<sub>3</sub> and T<sub>4</sub> of fenugreek seed powder with wheat flour were prepared and their rheological properties revealed the T<sub>4</sub> with best and healthy results. Physicochemical and sensory analysis of cookies depicted that T<sub>1</sub> was best as compared to rest of the treatments.

**Keywords:** fenugreek, physicochemical analysis, phenolic acids, antioxidant, rheology, cookies.

## **Vehicular Traffic Air Pollution as Expressed by Leaves of *Senna occidentalis* (L.) Link from Three Busy Roads in Nigeria**

**Jonathan Eromosele Otoide\* and Patrick Olugbenga Tedela**

Department of Plant Science and Biotechnology, Faculty of Science, Ekiti State University,  
Ado-Ekiti, Ekiti State, Nigeria

(received September 3, 2016; revised January 6, 2017; accepted February 22, 2017)

---

**Abstract.** Matured leaves of *Senna occidentalis* (L.) were collected along the sides of busy roads of Oluku, Agbor and Sapele in Benin city, Nigeria where they were constantly exposed to air pollution from vehicular traffic (polluted populations). Others were collected from forest areas of Ebvomodun, Ebvoneka and Eyaen villages, each located within the distances of 50-60 km away from Benin city, where there was no source of vehicular air pollution (non-polluted populations). Peelings of the adaxial (upper) and the abaxial (lower) leaf epidermis were stained and microscopic examination and line drawings results showed that the leaves of the polluted populations suffered epidermal cell aberrations which ranged from plugged stomata, epidermal cell erosion and occasional leaf perforations caused by the corrosive activity of some of the pollutants as they undergo chemical reactions. These forms of damages were not observed in the non-polluted populations which were healthy with opened stomatal pores. At the upper (adaxial) epidermis, the mean lengths ( $\mu\text{m}$ ) of stomatal pores of leaves of non-polluted populations of collections were  $0.64 \pm 0.41$ ,  $0.76 \pm 0.84$  and  $0.74 \pm 0.92$ , respectively and at the lower (abaxial) epidermis, the mean lengths were  $0.61 \pm 0.81$ ,  $1.40 \pm 0.95$  and  $0.71 \pm 0.81$  from Ebvomodun, Ebvoneka and Eyaen, respectively. In the same vein, the mean width ( $\mu\text{m}$ ) of pores of stomata of the non-polluted leaves collected from Ebvomodun, Ebvoneka and Eyaen were  $1.14 \pm 0.16$ ,  $0.32 \pm 0.63$  and  $0.32 \pm 0.11$ , respectively, at the upper (adaxial) epidermis. At the lower (abaxial) epidermis, the mean width ( $\mu\text{m}$ ) of pores were  $0.22 \pm 0.25$ ,  $0.30 \pm 0.51$  and  $0.39 \pm 0.16$  for collections from Ebvomodun, Ebvoneka and Eyaen, respectively. The stomatal pores of leaves of the polluted populations on the other hand were impossible to be measured because they were plugged by particulate air pollutants from the busy roads. It was opined that the leaves of the polluted populations would suffer eco-physiological stress by virtue of their plugged stomatal pores.

**Keywords:** *Senna occidentalis* (L.), vehicular traffic, air pollution, physiological stress, leaves

<sup>c</sup>Northeast Agriculture University, Herbin, China

(received September 14, 2015; revised November 14, 2016; accepted December 13, 2016)

---

**Abstract.** Three commonly cultivated oilseed crops *viz.*, soybean, sunflower and Indian mustard were sampled to compare density and diversity of spider at different developmental stages. This study was conducted at Ayub Agriculture Research Institute, Faisalabad, Pakistan. A total of 1210 spider individuals, 68 species and 5 families were sampled throughout the study period. The families showed different levels of association with the crops, like Lycosidae and Clubionidae were found commonly spread and highly abundant, whereas Philodromidae was only restricted to sunflower and locally rare. The *Evipa sohani*, *Pardosa fletcheri*, *Evipa shivajii* and *Pardosa oakleyi* were recorded most dominant and commonly spread spider species. Indian mustard constituted highest diversity of spider species followed by soybean and sunflower. Spider species diversity on the Indian mustard was significantly different from the sunflower. These predator species can play a major role to suppress devastating agricultural pests of oilseed crops, thereby enhance the crop yield.

**Keywords:** Araneae, agro-ecosystem, oil seed, ecology, agrochemicals, spider diversity

(received February 12, 2016; revised December 19, 2016; accepted December 28, 2016)

---

**Abstract.** Herbal plants and their derivatives have been utilized since antiquity in the control and management of poultry coccidiosis. The best known herbal plants in use against coccidiosis are corn, wheat bran, rice bran, polysaccharides, soya bean, barley, oat, extracts of grape seed, *Dictamnus dasycarpus* Turcz, *Pulsatilla koreana*, *Sinomenium acutum*, *Ulmus macrocarpa*, *Dichroafe brifuga* and other botanical antioxidants which contain many active compounds. These compounds have been found to possess antiprotozoal, anti-parasitic, anti-inflammatory and antioxidant properties. Currently demand and utilization of these aforesaid herbs has increased because these have been proved successful and effective in control of coccidiosis, eco-friendly and economical. The effective potential of these herbals and derivatives to have been reviewed overcome coccidiosis effectively in a better way than other synthetic products against which resistance has been developed.

**Keywords:** coccidiosis, immunomodulators, herbal plants, poultry

# Pakistan Journal of Scientific and Industrial Research

## Series B: Biological Sciences

### Volume 60

#### Subject Index

Abiotic stress tolerance in <i>Escherichia coli</i> .....	60B(2)74
Accumulation of heavy metals by living and dead bacteria.....	60B(2)106
Agroclimatic conditions of Skardu, response of potato .....	60B(3)132
Antiantioxidant activity using free radical scavenging assay of potatoes .....	60B(2)122
Antioxidant property analysis of various food supplements .....	60B(3)145
Banana mushroom blended jam, development and .....	60B(1)11
Barley and oat meal supplemented chapaties .....	60B(1)19
Biochemical evaluation of <i>Trigonella foenum graecum</i> (Fenugreek).....	60B(3)154
Biochemical profile in normal individuals, barley and oat meal .....	60B(1)19
Biosorbents, accumulation of heavy metals .....	60B(2)106
Blended jam, development and quality evaluation of .....	60B(1)11
Blended jam, influence of carrot pulp .....	60B(2)96
Buckwheat cookies supplemented with wheat flour .....	60B(1)27
Buffalo milk, the effect of beta cyclodextrin on.....	60B(2)91
Busy roads in Nigeria, vehicular traffic air pollution.....	60B(3)162
Carrot pulp fortified with different concentrations of apple pulp .....	60B(2)96
Cereals and pulses, a comparison of nutrient and .....	60B(2)119
Coccidiosis disease, role of herbal .....	60B(3)176
Coccidiosis: Present and future strategies for .....	60B(1)49
Comparison of direct seeded and transplanted rice .....	60B(2)116
Concentrations of apple pulp, influence of .....	60B(2)96
Control of avian coccidiosis: Present and future strategies .....	60B(1)49
Control of coccidiosis disease, role of herbal.....	60B(3)176
Development of buckwheat cookies supplemented with wheat flour .....	60B(1)27
DPPH radical scavenging assay, biological activities, nutritional composition.....	60B(2)84
Effect of physical, chemical and physiochemical treatments.....	60B(3)141
<i>Escherichia coli</i> , DOF transcription factor from rice .....	60B(2)74
Free radical scavenging assay of potatoes .....	60B(2)122
<i>Ganoderma lucidum</i> coffee, application of spectroscopic techniques .....	60B(3)145
Grass diversity in the historical Kalash valley .....	60B(2)63
Inorganic fertilizers, response of potato cultivars to .....	60B(3)132
<i>In-vitro</i> propagation, effect of physical, chemical and .....	60B(3)141
Kalash valley, grass diversity .....	60B(2)63
Maize cultivars and evaluation of vigour improvement .....	60B(2)69
Maize cultivars, nutrient priming in.....	60B(2)69
Medicinal plants <i>Salvadora persica</i> and <i>Solanum surattense</i> .....	60B(3)141
<i>Momordica charantia</i> seeds grown in.....	60B(2)84

Mutagenic effects on the growth, reproductive and .....	<b>60B(3)132</b>
Natural alternatives of therapeutics, control of avian coccidiosis .....	<b>60B(1)49</b>
Nutrient and dietary compositions of cereals and pulses .....	<b>60B(2)119</b>
Nutrient priming in different maize cultivars.....	<b>60B(2)69</b>
Nutritional composition and quality parameters of <i>Momordica charantia</i> seeds .....	<b>60B(2)84</b>
Oilseed crops, spider diversity in Central Punjab, Pakistan.....	<b>60B(3)168</b>
<i>OsDOF18</i> , a DOF transcription factor from rice .....	<b>60B(2)74</b>
Pakistan, a study on molecular diagnosis of <i>Theileria</i> .....	<b>60B(1)36</b>
Pakistan, compositions of cereals and pulses .....	<b>60B(2)119</b>
Pakistan, grass diversity in the historical Kalash valley, .....	<b>60B(2)63</b>
Pakistan, nutritional analysis and determination of .....	<b>60B(2)122</b>
Pakistan, quality parameters of <i>Momordica charantia</i> seeds .....	<b>60B(2)84</b>
Pakistan, spider diversity in .....	<b>60B(3)168</b>
Parameters of <i>Praecitrullus fistulosus</i> , mutagenic effect .....	<b>60B(3)132</b>
Pasteurized milk in polyethylene pouch packs, photo-oxidation of .....	<b>60B(1)46</b>
PCR amplification in sheep and goat.....	<b>60B(1)36</b>
Phenolic acids, biochemical evaluation of .....	<b>60B(3)154</b>
Photo-oxidation of pasteurized milk in polyethylene pouch packs .....	<b>60B(1)46</b>
Physiochemical and sensory properties of strawberry leather .....	<b>60B(1)1</b>
Polyethylene pouch packs, photo-oxidation of .....	<b>60B(1)46</b>
Potatoes ( <i>Solanum tuberosum</i> ), determination of antioxidant activity.....	<b>60B(2)122</b>
<i>Praecitrullus fistulosus</i> , mutagenic effects on.....	<b>60B(3)132</b>
Quality evaluation of banana mushroom blended jam .....	<b>60B(1)11</b>
Removal of cholesterol from buffalo milk, the effect of.....	<b>60A(2)91</b>
Response of potato cultivars to organic and inorganic fertilizers .....	<b>60B(3)132</b>
Rice, • <i>OsDOF18</i> , a DOF transcription factor from.....	<b>60B(2)74</b>
Role of herbal immunomodulators in control of coccidiosis .....	<b>60B(3)176</b>
Salt-affected soil, rice in response to .....	<b>60B(2)116</b>
<i>Senna occidentalis</i> (L.), vehicular traffic air pollution.....	<b>60B(3)162</b>
Serum biochemical profile in normal individuals .....	<b>60B(1)19</b>
Sheep and goats, a study on molecular diagnosis of <i>Theileria</i> .....	<b>60B(1)36</b>
Spectroscopic techniques for antioxidant property analysis of .....	<b>60B(3)145</b>
Spider diversity in some common oilseed crops .....	<b>60B(3)168</b>
Strawberry leather, effect of different concentrations of .....	<b>60B(1)1</b>
Sucrose and honey, effect of different concentrations of .....	<b>60B(1)1</b>
The effect of beta cyclodextrin on the removal of cholesterol .....	<b>60B(2)91</b>
<i>Theileria</i> species infection, a study on molecular diagnosis .....	<b>60B(1)36</b>
<i>Trigonella foenum graecum</i> (Fenugreek), biochemical evaluation of .....	<b>60B(3)154</b>
Vehicular traffic air pollution as expressed by leaves .....	<b>60B(3)162</b>
Waste soil, biosorbents: isolated from.....	<b>60B(2)106</b>
Wheat flour, development of buckwheat cookies .....	<b>60B(1)27</b>
Zinc, comparison of direct seeded and transplanted rice.....	<b>60B(2)116</b>

## **Pakistan Journal of Scientific & Industrial Research (PJSIR)**

### **Call For Papers**

Pakistan Journal of Scientific and Industrial Research (PJSIR) is the premier research journal of Pakistan and has been publishing for the last 59 years, comprising of original research papers in the fields of Physical and Biological Sciences. Since January 2011, the Journal has been bifurcated and now published bimonthly i.e. 6 issues in a year in two series as follows:

**Series A:** Physical Sciences (appearing as issues of January-February, May-June and September-October) including articles of Physics, Physical and Analytical Chemistry, Geology, Geography, Environmental Sciences, Technology) and

**Series B:** Biological Sciences (appearing as issues of March-April, July-August and November-December) including articles of Agriculture, Botany, Zoology, Microbiology, Biochemistry, Biological Chemistry, Genetics, Food Sciences, Pharmaceutical Sciences, Environmental Sciences).

PJSIR is an interdisciplinary open access peer-reviewed refereed journal and complies with the international standards and ethics of scientific community.

We publish original primary research articles/Review papers related to Biological Sciences, Physical Sciences and Technology. However, we do not entertain articles of Pure Mathematics, Computer Sciences, Social/Management Sciences and Medical Sciences. You may send it via e-mail [info@pjsir.org](mailto:info@pjsir.org) as well as through our website [www.pjsir.org](http://www.pjsir.org).

### **CALL FOR PAPERS**

Please submit your research papers for upcoming volume 61 of PJSIR for the year 2018.

# Pakistan Journal of Scientific and Industrial Research

## PCSIR - Scientific Information Centre

PCSIR Laboratories Campus, Shahrah-e-Dr. Salimuzzman Siddiqui, Karachi - 75280, Pakistan

Ph: 92-21-99261949-99261917, Fax: 92-21-99261913, E-mail: info@pjsir.org Website: www.pjsir.org

### EXCHANGE FORM

We wish to receive Pakistan Journal of Scientific and Industrial Research Ser. A: Phys. Sci. and/or Ser. B: Biol. Sci. in exchange of:

Name of Journal: \_\_\_\_\_  
Frequency: \_\_\_\_\_  
Subjects Covered: \_\_\_\_\_  
Institution: \_\_\_\_\_  
Address: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
Signature: \_\_\_\_\_  
Name: \_\_\_\_\_  
Designation: \_\_\_\_\_  
Date: \_\_\_\_\_  
E-mail: \_\_\_\_\_  
Fax: \_\_\_\_\_  
Phone: \_\_\_\_\_

### SUBSCRIPTION FORM

I / we wish to subscribe to 'Pakistan Journal of Scientific and Industrial Research' Ser. A: Phys. Sci. and/or Ser. B: Biol. Sci.  
The filled in proforma is being returned for compliance.

#### **Subscriber's data:**

Name: \_\_\_\_\_  
Address: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
E-mail: \_\_\_\_\_  
Fax: \_\_\_\_\_  
Phone: \_\_\_\_\_  
Signature: \_\_\_\_\_  
Order Membership No. (if any): \_\_\_\_\_

Tick the relevant box: ☐ Send invoice ☐ Bill later on ☐ Cheque for .....enclosed

#### **Revised Subscription**

Local: Rs. 2500/= per volume; Rs. 425/= per copy

#### **Rates:**

Foreign: US\$ 450/= per volume; US\$ 75/= per copy

Payment should be made through cross cheque in favour of PCSIR NIDA 16-3 NBP and mailed to the Director PCSIR - Scientific Information Centre, PCSIR Laboratories Campus, Shahrah-e-Dr. Salimuzzaman Siddiqui, Karachi-75280, Pakistan.

# INSTRUCTIONS TO AUTHORS

*Pakistan Journal of Scientific and Industrial Research, Series A: Physical Sciences* and *Series B: Biological Sciences* publish original researches as **full research papers, short communications and reviews**. Articles submitted to other journals for publication are not accepted. All manuscripts are evaluated by subject experts of advanced countries. However, authenticity of the contents remains the sole responsibility of the author/s. The Journal reserves the rights to edit, wherever considered necessary.

Manuscripts should be submitted with a covering letter, giving unabbreviated names and addresses of all the authors, indicating the corresponding author and certifying that the paper has neither been, nor will be sent elsewhere for publication.

Author/s may submit electronic copies in MS Word via e-mail or through our website. The manuscript should contain, in order, Running Title (not more than 60 characters), Title of the article, full names, addresses, telephone numbers, fax numbers, e-mail addresses of all the Authors, Abstract (not more than 150 words), three to six Keywords, Introduction, Materials and Methods, Results and Discussion, Acknowledgement (if applicable), References, Tables and Illustrations. All illustrations should be of good quality with legible captions. In case of coloured figures, 50% printing expenses would have to be borne by the authors. IUPAC rules for units and their abbreviations should be used. **Plagiarism Report** of the submitted paper must be attached and similarity index should be  $\leq 19\%$ .

References should be verifiable and cited in the text by the last name of the author (both authors if only two, the first author and *et al* when more than two) followed by the year, **in descending chronological order**. All references in the bibliography should be listed in alphabetical order of the authors' last names followed by date of publication and other complete details with full names of Journals as given below. Anonymous (Anon) references are not accepted.

## Papers of Journals

### In "Text"

Park (2005), Aksu and Kabasakal (2004) and Evans *et al.* (2000) (Park, 2005; Aksu and Kabasakal, 2004; Evans *et al.*, 2000)

### In "References"

Evans, W.J., Johnson, M.A., Fujimoto, Cy. H., Greaves, J. 2000. Utility of electrospray mass spectrometry for the characterization of air-sensitive organolanthanides and related species. *Organometallics*, **19**: 4258-4265.

### Books

Cinar, A., Parulekar, S.J., Undey, C., Birol, G. 2003. *Batch Fermentation: Modeling, Monitoring, and Control*, 250 pp. Marcel Dekker Inc., New York, USA.

### Chapters in Edited Books

Newby, P.J., Johnson, B. 2003. Overview of alternative rapid microbiological techniques. In: *Rapid Microbiological Methods in the Pharmaceutical Industry*, M.C. Easter (ed.), vol. **1**, pp. 41-59, 1<sup>st</sup> edition, Interpharm/CRC, Boca Raton, Florida, USA.

### Papers in Proceedings

Marceau, J. 2000. Innovation systems in building and construction and the housing industry in Australia. In: *Proceedings of Asia-Pacific Science and Technology Management Seminar on National Innovation Systems* pp. 129-156, Japan Int. Sci. Technol. Exchange Centre, Saitama, Japan.

### Reports

SIC-PCSIR. 2002. *Biannual Report, 2000-2001; 2001-2002*, Scientific Information Centre, Pakistan Council of Scientific and Industrial Research, PCSIR Laboratories Campus, Shahrah-e-Dr. Salimuzzaman Siddiqui, Karachi, Pakistan.

### Thesis

Saeed, A. 2005. Comparative Studies on the Biosorption of Heavy Metals by Immobilized Microalgal Cultures, Suspended Biomass and Agrowastes. *Ph.D. Thesis*, 248 pp., University of the Punjab, Lahore, Pakistan.

### Patents

Young, D.M. 2000. Thermostable Proteolytic Enzymes and Uses Thereof in Peptide and Protein Synthesis, US Patent No. 6,143,517, 7<sup>th</sup> November, 2000.

**Data Set from a Database** (information should be retrievable through the input)

Deming, D.; Dynarski, S. 2008. The lengthening of childhood (NBER Paper 14124) Cambridge, MA: National Bureau of Economic Research. Retrieved July 21, 2008 from <http://www.nber.org/papers/w14124> DOI No.....

**The manuscripts should be addressed to:**  
**The Executive Editor, Pakistan Journal of Scientific and Industrial Research, Scientific Information Centre, PCSIR Laboratories Campus, Sharah-e-Dr. Salimuzzaman Siddiqui, Karachi-75280, Pakistan.**

**Phone:** (92-21)-99261914, 16, 17, 99261949,

**Fax:** (92-21) 99261913
